

# Join our Blue Disruption with Electric Vehicles

## Join Our Blue Disruption. Partner with us, to save Mother Earth

With the Development and the Urbanization today, the largest source of climate pollution in India is Transportation. Whilst, the Indian Government has created a momentum to move towards a cleaner and a greener energy source - through its Faster Adoption and Manufacturing of Electric (& Hybrid) Vehicles (FAME) Scheme, that encourages and, in some segments, even mandates the adoption of Electric Vehicles (EVs), we at Cab-E have taken up the mantle to support the Govt's Goal of reaching 100% EV penetration by 2030.

At least, in the public commuting space.

When we say, with us, it is just not a Trip, but an Experience - it is. With us, you contribute to your Environment. It is about helping in the reduction of Carbon Emissions. It is about your allegiance to Mother Earth, to make our World a better place to be.

When you can enjoy a plethora of benefits for yourself whilst contributing to Mother Earth, why should you settle for anything lesser? If you have not taken a ride with us, try it now and experience the difference.

## Testimonials

**Ajit Gabhe**  
Commuter Thane

"I have been an user of Cab-E for more than 1 year now, it is very economical and a reliable option. I appreciate the company's policy about zero cancellation, zero surcharge and it is an option with Zero Pollution. I am regularly booking the weekly requirement through the App and the cab is provided by the company. The staff and drivers of the Company are courteous and helpful. I wish the company all the success for future growth. Thank you for your support as always."
